

EXPRESSION OF CONCERN

Guillain-Barré syndrome after surgical procedures: Predisposing factors and outcomes

With regard to the research article “Guillain-Barré syndrome after surgical procedures: Predisposing factors and outcomes” by Nagarajan et al.,¹ this expression of concern alerts readers that some omissions occurred in the review and revision processes, that further work is needed on the paper, and that we intend to withdraw it and publish a final version in the near future.
